Subject: 401 water certification permit for Duke's pipeline

Dear Sirs,

Please deny the 401 water certification permit for the Atlantic Coast Pipeline. We now know that the methane from fracked gas is the most damaging to our atmosphere and it traps 100 times more heat per liter than CO2. This pipeline could be a disaster for coastal NC.

We are considering putting solar on our house this year. We are thinking about the health of our grandchildren. Are you?
